VEEAM BACKUP BY SUMMIT

OWN, CONTROL, BACK UP AND RECOVER ALL YOUR DATA, ANYWHERE IN THE HYBRID CLOUD.

CHALLENGE

Many enterprise IT teams are not confident in their data protection strategies due to legacy backup inefficiency, unreliable recoveries and complex management across their entire data center.

Veeam Backup by Summit is the industry-leading backup, recovery and data security solution for all your workloads, both on-premises and in the cloud. As the foundational component of Veeam Data Platform, Veeam Backup delivers secure, powerful and reliable data protection. Eliminate downtime with instant recovery and stay safe from cyber threats with native immutability and tested backups, all from a software-defined, hardware-agnostic solution.

- Meet recovery objectives with confidence
- Reduce risk with comprehensive data security
- Accelerate your move to the hybrid cloud

KEY CAPABILITIES

Broad protection
Automate comprehensive backup across cloud, virtual, physical and NAS environments.

Freedom of choice
100% software-defined and hardware – agnostic solutions for ultimate flexibility.

Reliable recovery
Automated backup and replica testing ensures recovery in any disaster.

Instant Recovery
Achieve your service level agreements (SLAs) with reliable restores from the pioneer of instant recovery.

Automatic backup scans
Create malware-free backups thanks to automatic scans with trusted malware detection.

Scale out with ease
Reduce costs by combining any storage together to create a scalable backup repository.

Broad protection
Centralized AWS, Azure, and Google Cloud backup and recovery.

Freedom of choice
Recover across multiple clouds and platforms in a portable data format.

Reliable recovery
Get two-step recovery to any cloud for agile disaster recovery (DR), dev/test and analytics.

Instant Recovery
End-to-end immutability for your backups from the data center to the cloud.

Automatic backup scans
Use AWS KMS, Azure Key Vault, immutability, and more to keep ransomware out.

Scale out with ease
Automated verification exposes undetected malware before recovery.

PROTECTED WORKLOADS

Veeam Data Platform

Proven Recovery Orchestration

Proactive Monitoring and Analytics

Secure Backup and Fast Recovery

Native APIs

AWS
Azure
Google Cloud
Kubernetes

CLOUD VIRTUAL PHYSICAL APPS SAAS

AWS
Azure

On-Prem • In the Cloud • XaaS

Continuous replication avoids the data loss risks of traditional, snapshot-based recoveries

Save money on **licensing and infrastructure** costs

Set up strict **recovery point objectives** (RPOs) on an app-by-app basis

Call, email, or Slack a real person for support, not an outsourced phone tree

Summit's approach to availability goes beyond backup, leveraging intelligent approaches to data management and the managed service expertise needed to make hyper-availability a reality.
