

Veeam Cloud Connect

Avoid the risk of catastrophic data loss in case of a site disaster through hosted backup repositories with Veeam Cloud Connect. It's the easy, efficient way to get backups offsite to Summit.

Summit handles the infrastructure, support, and operations that keep your business running.

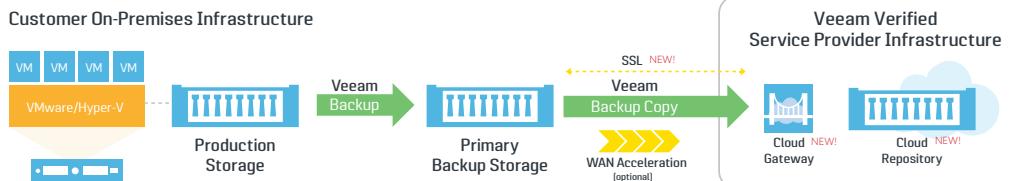

Instant Support

Talk, email, video or Slack with a person, not a phone tree or chatbot.

The Best Targets

High-availability, high-performance, production-quality targets with premium connectivity to meet your SLAs.

How It Works

RTO and RPO Requirements

Recovery time objectives (RTOs) and recovery point objectives (RPOs) vary significantly from service to service. Your requirements may be as simple as pointing to a high-performance, high-availability target for an existing Veeam deployment, or as complex as multi-site backups with reserved compute instances to spin up if needed.

OUR PROMISE

At the end of the day, choosing Summit for a Veeam Cloud Connect target means that you can focus on your business and leave the rest to us. We'll be here for you every step of the way.
