Licensing		BYOL

"With Summit, all those pesky Sage errors and issues go away. Sage works better when you outsource the server hosting to Summit."

— SAGE CUSTOMER

Sage Desktop vs. Sage Online

FEATURE	SAGE DESKTOP FROM SUMMIT	SAGE ONLINE
Critical Business Functionality	✓ Advanced features like enhanced payroll, inventory, pricing, and timesheets.	✗ Limited functionality; lacks many advanced tools needed for complex businesses.
License Optimization	✓ One price per user with unlimited financial entities.	✗ Charges per user and per financial entity, quickly adding up in costs.
Personalized Service	✓ Comprehensive implementation and ongoing support for Sage and other applications.	✗ Generic documentation
Third-Party Integrations	✓ Supports over 200+ essential third-party apps.	✗ Limited third-party integrations, restricting functionality.
Security	✓ Advanced cybersecurity on private servers.	✗ Basic shared-cloud security with greater exposure to risks.
Availability	✓ 99.99% online uptime and full offline capability.	✗ 100% dependent on internet with no offline access.
Support	✓ 24/7 live, U.S.-based support with under 20-minute response times.	✗ Slow and complicated chat-based support with no live assistance guaranteed.

Focus on everything but hosting Sage.

As a **Sage hosting provider** for decades, Summit offers more than just a **secure and reliable hosting environment**. We're your partner in making Sage work for your business. From **hosting setup and installation** to **daily backups and technical support**, we've got you covered at every step.

Sage hosted by Summit is the right choice when:

- > Your business relies on **advanced features exclusive to Sage Desktop**
- > **Data privacy and control** are critical concerns for your organization
- > **Avoiding license fees for each financial entity** is a priority
- > You want to **focus on growing your business** rather than managing **IT infrastructure and cybersecurity**
- > You want to **leverage the latest technology** without **large upfront costs in hardware**

TESTIMONIAL

“Summit is one of the very few companies I don't hate to have to contact. Most companies take days to respond and only escalate to an actual engineer after you've relayed your issue several times. Summit's support escalates problems almost immediately.”

— GARRETT B., CUSTOMER SINCE 2015

Here's why 10,000+ businesses trust Summit to run Sage:
